

American Academy is proud to partner with TransPower Company by implementing power management control systems at our campuses.

Because of these systems, we have seen a \$40,000 annual savings per campus. The implementation of these systems was quick and easy and we instantly starting seeing savings.

With these significant saving, we are able to help our staff by increasing salaries, all while being more energy efficient and doing our part for the environment.

A win/win for American Academy!
